

Nefra Connections

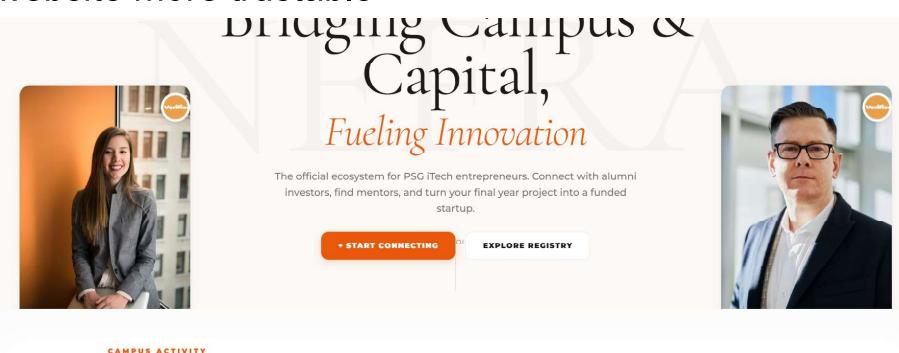

Nefra Connections

Home page corrections:

- The current logo of the Nefra Connections is good but i think we can design something better if it is designing takes more it is ok but if we can we can do it
- We have already talked about the error that we need to correct in the home page

- Refer to the image given below instead of giving the pictures of the investors. We can actually give the image of the people you got investors through our website , while the people are viewing the details inside the image they are actually know about the real review of the people and this could make our website more trustable

Tab 2

- So, as we have discussed we need to create login/signup page
- When I'm going through the home page i have noticed that i can only see about the investors but i think the Entrepreneurs can also have a separate login or signup page so that the interested investors can also approach them which could make our website more interesting and useful
- It can made by while they are signing up for first time in the sign-in detail page we can have a separate option for Entrepreneurs and investors
- While going through the campus activity and recent matches in home page i have noticed that the portrait pictures are looking good more than landscape pictures because the portrait picture is more visible than landscape in the landscape picture the half face of the women is not visible. Refer to the i have given below

CAMPUS ACTIVITY

Arjun Mehta
ALUMNI FOUNDER

Dr. Suresh Kumar
ANGEL INVESTOR

- From campus to corporate theme it seems good and it doesn't need any change
- So the big thing I have noticed here is there are exactly five options (Not including the find investors page) in the home page for going to find investors page why so much. We need to definitely change that. Refer the image i have given below

Tab 3

- While i try to see the details of the investors it is not opening

CAMPUS ACTIVITY

These image actually not opening

- Refer the above image there is option for start connections or explore registry . I could think that we can replace that with Login/Signup
- And this all for homepage
